|  <p>The graph shows the relationship between Input Current [A] on the Y-axis (0.0 to 2.0) and Load Current [A] on the X-axis (0.0 to 3.0). Three curves are plotted for different input voltages: 100V (solid line with triangle markers), 200V (dashed line with square markers), and 230V (dash-dot line with circle markers). All curves show an increasing trend of input current with load current. A slanted line is drawn across the graph, representing the rated load current range.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

The value for "One of phases" is the reference value only.

2. Condition

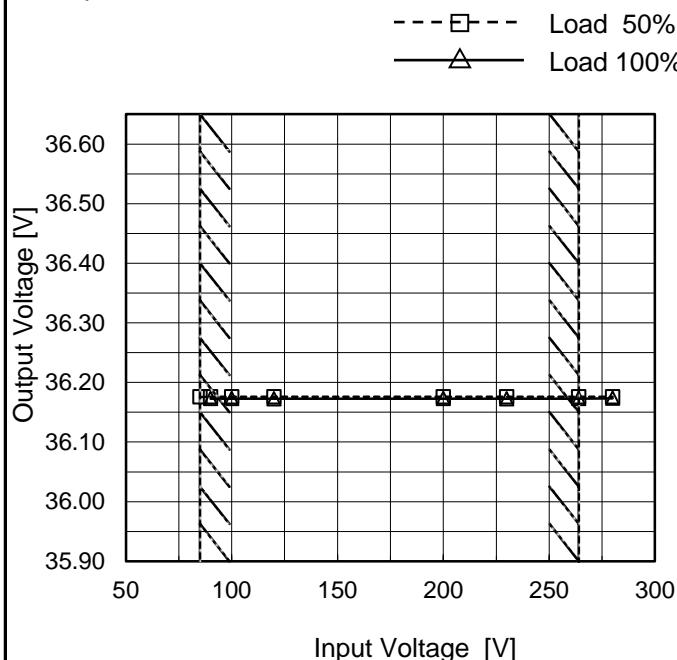

Leakage current value is concluded after measuring both phases of AC input and by choosing the larger one.
